DETAILED ACTION

Claim Objections

Claims 31-32 are method claim or device claim. If claims 31-32 are method claim, applicant should provide steps to **perform** a method claim and not steps "**means for**". The language "**means for**" shows only in device/apparatus claim.

Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper independent method/device claim form, or rewrite the method/device claim(s) in independent form.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-14 and 31-32, drawn to a method and device for identifying non-conforming groups of items within a package, classified in class 356, subclass 394.
- II. Claims 15-30, drawn to a spectrographic inspection system/ a fiber optic inspection manifold comprising a first and second plurality of probes, a first column spectrometer, a first row spectrometer, and a processor, classified in class 356, subclass 237.1.

The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does

not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the patentability of the combination does not require a particular of the subcombination as claimed. The subcombination has separate utility such as microscope, spectrophotometers, colorimeters, or refractometers..

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Group II is not required for Group I, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

A telephone call was made to Mr. Craig A. Neugeboren on 09/26/03 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Sang H Nguyen whose telephone number is 703-308-6426. The examiner can normally be reached on M-F 9AM-6PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Frank Font can be reached on 703-308-4881. The fax phone number for the organization where this application or proceeding is assigned is (703) 872-9306.
